

IncellDx, Inc. Receives ISO 13485:2003 and ISO 9001:2008 Certifications

Menlo Park, CA, March 3, 2011- IncellDx, Inc. today announced that the Company has received ISO 13485:2003 Certification, an internationally recognized quality standard designed to ensure that medical device manufacturers have the required quality management systems in place to safely design, manufacture and distribute medical devices. The company simultaneously achieved ISO 9001:2008 Certification. Both awards came with zero deficiencies.

“These awards are the culmination of a year long, concerted effort to put in place a truly state-of-the-art quality management system”, according to Bruce Patterson M.D., IncellDx’s Founder, President and CEO. “This system reflects our continuing commitment to provide our customers with the very highest quality products possible.”

“Obtaining these ISO certifications demonstrates IncellDx’s strong commitment to its customers. We are proud to be their partners.” Theodore Zafiropoulos, Managing Director of P. Zafiropoulos S.A. and FlowCytogen Laboratories Ltd in Athens Greece.

Having solid design control and quality management systems provides the process for providing reliable and reproducible results. With current customers spanning the globe, IncellDx is focused on helping provide high quality information to enhance patient care. IncellDx will be pursuing FDA regulatory approval for its HPV assay with a clinical trial planned in 2011.

About IncellDx, Inc.

IncCellDx, Inc. is a revenue stage company headquartered in Menlo Park, CA. Their proprietary technology allows the combination of intact cell analysis simultaneously with molecular results. The first indication is for HPV screening where the digitized morphology is captured and stored with molecular data. Visit www.incelldx.com for more information.
